

Prof.

# Garima Jaitly

---

Lead Trainer at Technogiggles

The Data Science and Artificial Intelligence & Machine Learning programs, specializing in translating complex concepts into clear, practical learning experiences through hands-on projects and real-world case studies. She currently serves as an Assistant Professor at a reputed university, where she teaches Python programming, Machine learning, Analytics, and Business Intelligence, and actively contributes to curriculum design and academic research in emerging technologies.

With a strong academic foundation that includes an MSc in Big Data and Artificial Intelligence for Business from Montpellier Business School, France and over a decade of corporate experience with companies such as Genpact, Wipro, Teleperformance in business analytics and process improvement, Prof. Garima brings a unique blend of industry and academic perspective to her classrooms and training sessions. Her background in global organizations, where she led data-driven initiatives, system implementations, and performance optimization, enables her to mentor learners on both technical skills and real-world application, preparing them for high-impact roles in today's data-driven economy.

Passionate about learner success, Prof. Garima focuses on building problem-solving mindset, coding confidence, and storytelling with data, especially for learners transitioning from non-technical backgrounds. Her commitment to continuous learning and innovation ensures that Technogiggles trainees gain future-ready, industry-relevant AI/ML and data science skills.
